Education

Expected May 2029

Cornell University (Cumulative GPA: 4.067)

B.S. in Information Science (UX concentration)

Relevant Coursework

Introductory Design for Web, Design and Innovation, Product Strategy, Intro to Data Science

Experiences

September 2026 - Present

Trip.com Group, Lead Design Consultant (via Design Consulting at Cornell)

- Led an 8-person team to redesign Trip.com's post-booking flight support for Gen Z, leveraging 8 competitor analyses, 16-study literature review, and 44 user interviews to uncover Gen Z travelers' support needs
- Synthesized 777 interview quotes into 196 codes and 18 themes through thematic coding, translating key findings into 8 design solutions
- Presented research findings to Trip.com's leadership team and led internal work sessions, aligning research focus with the client and relaying client feedback to keep the team on track

July 2026 - August 2026

Damai Entertainment (Alibaba Group), Product Design Intern

- Redesigned Damai's B2B mobile app for event organizers to view real-time ticketing data, streamlined user flows across 10 shipped screens and reduced data lookup time by 42.6%
- Interviewed 8 sales team members and 5 event organizers to surface usability issues such as cluttered layouts and limited guidance in locating data, informed iterations across 3 core screens
- Rebuilt the design system for a modernized appearance and delivered 19 reusable components, collaborated with product team to maintain visual consistency with Damai's other B2B products

May 2026 - August 2026

Wapoo AI, Product Design Intern

- Shipped 23 iOS screens for an AI short-video app, including a World Cup event refined through 259 wireframe iterations that drove 3,450 total new uploads, a 183% increase on the daily average
- Led full UI revamp refining Wapoo's neon aesthetic for Gen Alpha, produced 5 UI directions with motion design for page transitions, raising user preference from 38% to 58% across 100 users
- Built and maintained Wapoo's design system of 32 components; partnered with developers to translate Figma's blur effect into reusable code parameters, adopted across 75.8% of screens, speeding up design-development handoff by ~30 minutes per component
- Integrated AI into the design workflow, shipped 15 in-app graphics and 30 profile avatars through AI image generation, used Stitch and Figma AI for layout exploration to boost design efficiency

January 2026 - May 2026

Muji USA, Product Designer (via Design Consulting at Cornell)

- Revamped Muji's e-commerce site by balancing promotion with its minimalist identity, leveraging 14 interviews and 21 competitor analyses to deliver 3 user flows and a full design system
- Led design of the checkout flow, introducing free-shipping progress and product suggestions in non-intrusive layouts, validated through 7 rounds of usability and accessibility testing

September 2025 - May 2026

Gorest, Product Design Intern

- Led the design of an AI-powered game engine, delivering interactive prototypes for 13 features (e.g., AI 3D model generation) through rigorous user research and testing
- Streamlined AI workflows and implemented intervention mechanisms, increasing task completion rates by 50% and reducing average completion times by 66% in AI-related flows
- Rebranded Gorest's logo and palette with the marketing team through 50+ iterations, establishing a modern visual identity across the official website, product UI, and social media platforms
- Led design walkthrough on the MVP with engineers, testing rendering across browsers and resolving 24 design–implementation mismatches to raise design fidelity before launch

Awards & Skills

- **Skills:** User Research, Usability testing, Prototyping, Vibe coding, AIGC Design, UI/UX design
- **Software:** Claude Code, Midjourney, Stitch, Google Flow, Figma, After Effects, Jitter, Framer
- **Awards:** Rice Designathon 2026 Finalist
